

Vaccine Resources

You can use the VoICE Vaccine Resources page to find key immunization data sources, maps, interactive visualizations, technical reports, and other resources from credible partner organizations.

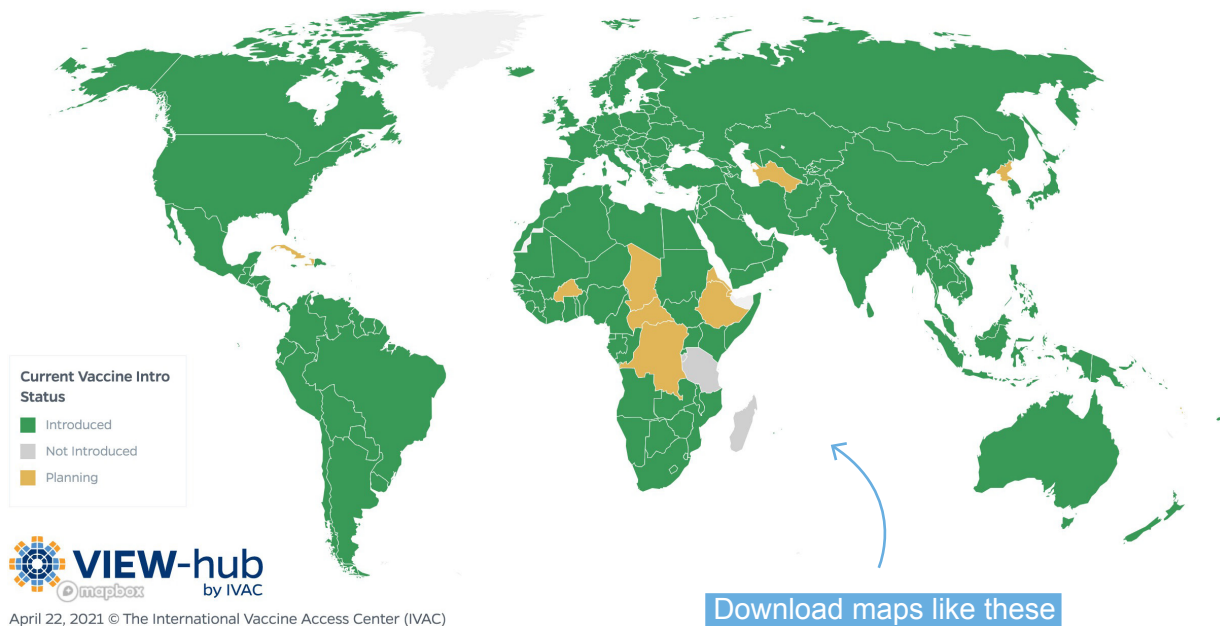

Finding Immunization Coverage Estimates

Find global, regional, and country-level data on vaccine coverage.

VIEW-hub

[VIEW-hub](#) is a repository for visualizing vaccine data. Find country-level information about topics such as vaccine introduction, immunization equity, and the latest academic studies on vaccine impact.

Features include: Instant data visualization, custom queries & maps, exportable graphics.

WHO-UNICEF Estimates of Vaccine Coverage

Released annually, WHO and UNICEF National Immunization Coverage (WUENIC) estimates are systematic assessments of the most likely national immunization coverage levels for each country.

- [WHO-UNICEF National Immunization Coverage Estimates \(WUENIC\)](#)
- [Immunization country profiles](#)
- [Global and regional immunization profile](#)
- [Immunization coverage estimates data visualization](#)

WHO Immunization, Vaccines and Biologicals Department

Find additional sources for data, position papers, graphics, and other resources [here](#).

Finding Disease Burden and Mortality Estimates

Find disease burden and cause of death data at the global, regional, and country levels.

WHO Global Health Observatory

Find country-level data, visualizations, and related indicators on causes of child death, child mortality numbers of deaths, deaths per 1000 live births [here](#).

UNICEF Child Mortality Data

Build your own dataset, query data, or directly download data on annually updated indicators for country-specific datasets [here](#). Estimates are generated by the UN Inter-agency Group for Child Mortality Estimation (UN IGME).

WHO Vaccine-Preventable Diseases: Monitoring System

Find the annual number of reported cases for 9 vaccine-preventable diseases. The Country-level data pages also include additional information on: percentage target population vaccinated by antigen, official country estimates, and immunization schedule.
